

QGIS Application - Feature request #13335
http- field attribute from WMS-service gives highlighted/clickable text

2015-09-09 07:01 AM - Filip Mahieu

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WMS	
Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 21388
Description		
<p>In certain WMS-services, attribute-info comes with a http://-hyperlink. This hyperlink is viewable on the internet en gives you all kinds of data about the object.</p> <p>However, in QGis, the hyperlink stays plain-text. It would be very nice to have this column as a highlighted hyperlink on which you can click and so get the immediate info.</p> <p>The WMS-link I use is http://geodiensten.gisoost.be/arcgis/services/atlaswaterlopen/Mapserver/WMSServer?version=1.3.0&layer=1950-Waterlopen.</p>
