

QGIS Application - Bug report #13356

editing in file geodatabase

2015-09-14 02:09 AM - Monique Vanvinckenroye

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider	
Affected QGIS version:	2.8.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 21409
Description		
<p>In QGIS 2.6 (Brighton) was het mogelijk om te editeren in een file geodatabase. Dit is niet meer mogelijk in de versies Wien + Pisa. Is er een alternatief hiervoor in de nieuwe versies?</p>

- Status changed from Open to Feedback

What geodatabase file do you have? Is it ESRI gdb/mdb file?

- Status changed from Feedback to Closed

- Resolution set to invalid

closed anyway as questions must be posted in english.

By the way:

file geodatabase open with both the Open driver and the closed one, the latter available in osgeo4w. Only with the closed layers are editable. Personal geodatabase are read only.

The database i am using is ESRI gdb/mdb file.

Is it possible to edit in this database? It was in qgis Brighton.

- Status changed from Reopened to Feedback

Are you using 32-bit QGIS or 64-bit? I assume you are using MS Office 32-bit
