Description

Hi -

This isn't an issue with Processing not working or a folder not being correctly identified. Whenever I click: Processing | Options | Providers | Tools for Lidar Data and click the dialog window to change the folder location for LASTools, I get a Python error that seems to suggest an issue with the Qt library? Thanks for looking into this.

Some providers are being removed from QGIS/Processing (will be available as plugin) and so are their categories in the bug tracker. To not leave them orphaned of a category they are being reassigned to processing/core.

#5 - 2017-05-01 11:06 AM - Giovanni Manghi

- Category changed from 127 to Processing/Core
