

## QGIS Application - Feature request #13389

### Print composer : Keep previewed feature when "preview atlas" is reactivated

2015-09-21 09:09 AM - Harrissou Santanna

<b>Status:</b> Open	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Map Composer/Printing	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 21441
<b>Description</b>	
<p>Configure an atlas generation.</p> <p>Activate the "preview atlas" to preview features. And choose one in the list (other than the first one).</p> <p>Deactivate the preview; the feature you were previewing is still shown in the combobox.</p> <p>Reactivate the preview option : the feature is replaced by the feature n° 1.</p> <p>It'd be nice to keep the previewed feature if it still matches the configuration set (let's say if the "apply configuration" button was not hit meanwhile).</p> <p>master 13fe3a0 (qgis 2.11) osgeo4w 64bits</p>

- *Description updated*

Has this been fixed in QGIS 3?

**#3 - 2018-01-30 09:50 AM - Harrissou Santanna**

No (commit:d2244b4a79). When reactivating the preview, it still goes back to the first item in the list.
