

QGIS Application - Feature request #13407

Add "repeat labels" option when labelling inside a polygon

2015-09-23 07:40 AM - Harrissou Santanna

Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
<div>Description</div> <div>Line features can be labelled many times using the repeat option in Placement tab. The same option is available for polygon only when using perimeter option. It'd be nice to have the repeat option also for labels within the polygon feature. This may be useful when the feature is wide and has an odd shape.</div>
