| Status: Closed | |
| Priority: Normal | |
| Assignee: | |
| Category: Symbology | |
| Affected QGIS version: 2.10.1 | Regression?: No |
| Operating System: | Easy fix?: No |
| Pull Request or Patch supplied: | Resolution: fixed/implemented |
| Crashes QGIS or corrupts data: | Copied to github as #: 21463 |

Description

- open a line layer
- apply a style defined for polygons, rule based
- then I go back to Single symbol style
- the style remains of type polygon, and I cannot find a way to have my lines style back.

History

#1 - 2016-05-24 01:23 PM - Saber Razmjooei

- Resolution set to fixed/implemented
- Status changed from Open to Closed

Works fine in master. You can no longer apply styles unless the geom types match.
