Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	21485

Description

A newly introduced composer export feature in the 2.12 dev cycle doesn't seem to function properly.

Steps to reproduce:

1. Create a new project
2. Create a new composer
3. Export the blank composer to image
4. When the Image Export Options dialog pops up, set the page width to 1000px
5. click on the Save button
6. Open the exported file, the width is 3507px (A4's width under 300dpi), not 1000px
