

QGIS Application - Bug report #13453

QGIS crashes when applying rule based label using data defined setting

2015-09-29 06:35 PM - Nyall Dawson

Status: Closed	
Priority: Severe/Regression	
Assignee: Martin Dobias	
Category:	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: Yes	Copied to github as #: 21500
Description	
Steps to reproduce: 1. add a new rule based label 2. apply a data defined override to a property in the label 3. try to apply the layer settings - crash!	

Associated revisions

Revision 1c877f11 - 2015-09-30 06:36 AM - Martin Dobias

Fix another crash with rule-based labeling + data-defined properties (fixes #13453)

The writing of data-defined properties to XML was using invalid data.

Also fixes a possible memory leak in assignment operator.

Thanks Nyall for help tracking it down!

This code has been funded by Tuscany Region (Italy) - SITA (CIG: 63526840AE) and commissioned to Gis3W s.a.s.
