

QGIS Application - Bug report #13464

Exported file differs from print composer preview

2015-09-30 06:58 AM - Zeis Verena

Status:	Closed	
Priority:	High	
Assignee:		
Category:		
Affected QGIS version:	2.10.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 21511
Description		
<p>Hello there,</p> <p>I have the following problem.</p> <p>I try to compose a picture of different map layers (see file "mappreview") and lock every single element.</p> <p>It looks fine in the preview but when I export it, the export file only shows the current extract (see file "finalmap"). And whn I duplicate the composer file, the duplicate also looks like the export file.</p> <p>I am using version 2.10.1-Paris.</p> <p>Please help</p>		

History

- Status changed from Open to Closed

I found a work around by creating on composer file per map part, saving each as png and creating a new composer file where I added all parts as image.

- Resolution set to invalid

Most likely you are using the "cache" setting for the map item, so it won't be redrawn unless you manually hit the refresh button. I think what you are trying to achieve could be done instead using a combination of selecting the "lock layers for map" and "lock styles for map" checkboxes in the map item properties.
