QGIS Application - Bug report #13473
oracle show 0 when asked for 'show feature count' in layer list

2015-10-01 02:31 AM - Richard Duivenvoorde

Status:	Closed			
Priority:	Normal			
Assignee:	Jürgen Fischer			
Category:	Data Provider/Oracle			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	invalid	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	21520	

Description

see title and screenshot

I loaded a shp file with 354 features in oracle via ogr2ogr

Loaded both the shp and the table in oracle, and in the layer manager/list asked 'Show feature count' in context menu.

As you can see it shows zero, BUT the features are ok and visible...

- Status changed from Open to Feedback

Are you using estimated metadata data and is the table analyzed? Otherwise Oracle claims that the number of rows is 0.

If

    SELECT num_rows FROM all_tables WHERE owner='SOMEONE' AND table_name='SOMETABLE';

returns 0, although the table isn't empty it should change after running

    ANALYZE TABLE sometable COMPUTE STATISTICS;

If you get ORA-38029 you should run

    exec DBMS_STATS.UNLOCK_TABLE_STATS('SOMEUSER','SOMETABLE');

first.
