

QGIS Application - Bug report #13487

QGIS allows to create tables with invalid field names

2015-10-02 12:46 AM - Paolo Cavallini

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Attribute table	
Affected QGIS version:	3.0.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 21532
Description		
<p>QGIS allows you to create a dbf table (associated with a shp) with invalid column names (e.g. "1"). As a consequence, further commands may obviously fail. IMHO we shouldn't allow invalid names.</p> <p>See e.g. http://forums.esri.com/Thread.asp?c=93&#38;f=988&#38;t=56672</p>		

History
