Description

QGIS is crashing on exit. When I open any project, and after ending work, trying to exit, after some time I'm getting "Core dumped".

Ubuntu 14.04, Ubuntu 14.04 (2.11.0+git20151002+00ea5b4+20trusty).

What to do, for better problem debug?

Can you disable all plugins to be sure that they are not the root of the problem.
