Do you mean the table tab?

I can see the attribute table either SL or PostGIS (with revision 396ec22).

the table (of attributes) preview in DB Manager. This is on QGIS master.

#3 - 2015-10-04 12:00 PM - Salvatore Larosa

Which revision you are getting this with?

mine is QGIS master too.

#4 - 2015-10-04 12:04 PM - Giovanni Manghi

- *File dbman added*

QGIS code revision

ed32f49

and is on Windows, because at the moment I cannot test on Linux.

See attached image.

- Operating System set to Windows

I think we have need more feedback here.

Do you are getting some error? messagelog?

while trying to preview many tables I get this #13505

that has already been fixed, but as I said at the moment I cannot compile on Linux, so I must wait a new build for Windows.

#7 - 2015-10-04 12:43 PM - Salvatore Larosa

on Linux with latest master works fine and you haven't need to build to test it.
But you can try to apply the patch in commit:396ec2, I am pretty sure that fix the issue!

Just download data_model.py file from github and replace it in apps/qgis-dev/python/plugins/db_manager/db_plugins/

Thanks.

- Status changed from Open to Closed
- Resolution set to invalid

right, I forgot db manager is python. That fix fixed also this issue.

#9 - 2015-10-04 12:49 PM - Salvatore Larosa

That's why I tagged the issue as feedback! ;-)
