Description

I'm using the QGSrelationeditorwidget in a custom form with qtcreator but I can't fit my subform due to the large amount of data present inside of it. I wondering if it were possible to set the width of the leftmost column (where there is the selection of the related record) because it is huge and it use the main part of my form.
It is possible to add a properties to set the column width ?

- Easy fix? set to No

#2 - 2017-09-22 10:07 AM - Jürgen Fischer

- Category set to Unknown

#3 - 2019-05-21 02:39 PM - Regis Haubourg

- Status changed from Open to Closed

- Description updated

From what I see in QGIS 3.4 and 3.6 all column width are cutomizable. please reopen if necessary and add screenshots to clarify your need
