Affected QGIS version:	master	Regression?: No
Operating System:	unspecified	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 21582
Description		
<p>Every now and then, I hit an issue with the composer legend item whereas raster layer legend symbols are rendered with a static border that can't be disabled nor styled. Layout-wise, this often leads to a visual clash with the design style created by the user.</p> <p>For e.g., I've GIMPed a static border (current behavior) versus a fictive no-border alternative for a legend I'm working on ATM: http://i.imgur.com/9EORfAD.png</p> <p>IMO, the no-border alternative is much nicer.</p>

Revision d1be2ff2 - 2015-10-08 09:12 PM - Nyall Dawson

Fix hardcoded border for raster legend items (fix #13540)

Previously raster legend items always had a fixed black border.
Now there's options to change the color/width of this border or disable it entirely.
