

QGIS Application - Feature request #13552

Add QGIS authentication for Oracle connections

2015-10-09 01:51 AM - Médéric RIBREUX

Status:	Open	Resolution: Copied to github as #: 21594
Priority:	Normal	
Assignee:		
Category:	Data Provider/Oracle	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Dear devs,</p> <p>the new Authentication configuration system with master password will be introduced into QGIS 2.12. For the moment, only postgresql and webservices connections are supported.</p> <p>In postgresql connection dialog, there is a "Configurations" tab that make the link between a database connection and a login/password that has been declared in the authentication database.</p> <p>It would be great to have the same mechanism and dialog for Oracle connections to improve QGIS security and to ease Oracle users password management.</p> <p>Perhaps could it be made for QGIS 2.14 ?</p> <p>Best regards !</p>
