Description

In my opinion, a histogram would be a logical addition to the output of basic statistics.

This is the place where many users would look first.

I have implemented this in a pull request: https://github.com/qgis/QGIS/pull/2358

In my implementation, it is possible to set the number of bins and the range (min. and max values). It is also possible to choose between a traditional histogram an a cumulative one. I have also added a splitter, so that the user can adjust the split between the statistics window and the histogram window.

History

#1 - 2016-03-25 07:25 AM - Alexander Bruy

- Status changed from Open to Closed

fTools was removed from QGIS.

#2 - 2017-05-01 01:21 AM - Giovanni Manghi

The "ftools" category is being removed from the tracker, changing the category of this ticket to "Processing/QGIS" to not leave the category orphaned.
