QGIS Application - Bug report #13561
Refine rules dialogs create invalid rules for expressions

2015-10-10 09:32 AM - Anita Graser

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Symbology		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	duplicate
Crashes QGIS or corrupts data:		**Copied to github as #:**	21603

Description

This affects Refine current rule | Add categories to rule as well as Add ranges to rule.

If you use an expression such as COL1/COL2 to create a classification, the resulting rule will be, e.g. "COL1/COL2" >= 0 AND "COL1/COL2" <= 10

There are actually two errors here:

1. QGIS cannot find a column "COL1/COL2" and therefore won't draw the rule.
2. The rules overlap because they are always generated using >= and <= rather than > and <=.

History

#1 - 2015-10-10 11:26 PM - Nyall Dawson

- Resolution set to duplicate

- Status changed from Open to Closed

Duplicate of #10815
