

QGIS Application - Bug report #13598

Bad allocation when call raster layer property

2015-10-14 01:39 AM - Alexander Lisovenko

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Affected QGIS version:	2.8.3	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 21640
Description 1. I will add a lot of wms layers to the project. 2. There is a rapid increase of used memory (50 layers - more than 600 MB). 3. Just in my project 180 layers. 4. I try to open the layer properties and get a 'Bad Allocation' error. Error is reproduced with different number of layers in the project. Sometimes 150, sometimes more than 150.
