Easy fix?: No	Copied to github as #: 21653
Description	
Has there been any discussion about implementing head/tail breaks as a choropleth categorization on layers? It seems like it wouldn't be difficult to implement. Here's a paper that introduces the concept: http://arxiv.org/pdf/1209.2801.pdf

Hi

There is already a related implementation in Axwoman 6.3 (function name "HT mapping", <http://fromto.hig.se/~bjg/axwoman/>) about using head/tail breaks for choropleth maps, and for point and polyline feature as well.
