Crashes QGIS or corrupts data:		**Copied to github as #:**	11427	

Description

Launch of 1.0 Preview 1 fails on Vista x64 SP1.

Something to do with the x64 program files being located in 'Program Folders (x86)' and presence of brackets in folder path maybe?

- Resolution set to fixed

- Status changed from Open to Closed

I assume this is fixed with the new installer. Reopen it if appropriate.
