

QGIS Application - Feature request #13734

SQL result limiting in DBManager

2015-11-02 03:47 AM - Mehmet Selim BILGIN

Status:	Open	Resolution: Copied to github as #: 21761
Priority:	Normal	
Assignee:		
Category:	DB Manager	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>While working with huge tables without limiting the query size causes freezing DBManager. I think it should returns limited row for example 20. If users want to load all he/she clicks load all button. Also there should be a button that loads second 20 result (like next page...) This feature is very useful in PL/SQL Developer.</p>
