Pull Request or Patch supplied:			**Resolution:**	fixed
Easy fix?:	No		**Copied to github as #:**	11436

Description

For those of us who use the Python console frequently, a major improvement would be the implementation of some form of command history. This is a standard function in most command line utilities (ex. linux terminal), so that users can move up and down between previously entered commands.

This would be a relatively simple, yet extremely helpful enhancement.
