

QGIS Application - Bug report #13771

"Merge selected features" tool doesn't erase the original features

2015-11-06 03:35 AM - Daniele Apicella

Status: Closed	
Priority: Normal	
Assignee:	
Category: Vectors	
Affected QGIS version: 2.10.1	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: duplicate
Crashes QGIS or corrupts data: No	Copied to github as #: 21797
Description	
<p>I merged a number of features with the specific tool. The merged feature was created and the attributes table showed only the new feature.</p> <p>As I opened the shapefile with ArcGIS, the original unmerged features, together with the merged one, appeared both as shapes and in the attributes table.</p> <p>Again in ArcGIS I removed the old features but, as I saved the edits, the shapefile appeared to be corrupted. A message warned that the number of geometries didn't correspond to the number of records. Bye bye shapefile.</p>
