- Resolution set to invalid
- Status changed from Open to Closed

There're currently a lot of API changes going on to cleanup the API for the release of version 1.0. See <http://wiki.qgis.org/qgiswiki/VisualChangeLog1.0.0> for details.

So this is a plugin "bug", but there's not much point in fixing the plugins now. Once the API stablizes all plugins need to be updated for the new API.
