QGIS Application - Bug report #13799
'Merge' algorithm can't recognize GeoTiff layers

2015-11-10 02:18 AM - Janos Meszaros

Status:	Closed		
Priority:	Normal		
Assignee:	Victor Olaya		
Category:	Processing/GDAL		
Affected QGIS version:	2.12.0	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	worksforme
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	21824

Description

I wanted to mosaic two DEM layers using Processing toolbox 'Merge' algorithm but it failed to create resulting dataset. I checked the log in Log Message Panel and it says: '_2015-11-10T11:08:39   1   Data source is invalid ()_' but my layers are simple GeoTIFF files. I also attached a screenshot about log of the algorithm (merge_alg_02.png).
Is there something wrong with GDAL?

- *Status changed from Open to Feedback*

works fine here. Please attach sample data and testing directly gdal_merge from the command line would help.

#2 - 2015-12-19 10:42 AM - Giovanni Manghi

- *Resolution set to worksforme*

- *Status changed from Feedback to Closed*

closing for lack of feedback.
