

QGIS Application - Bug report #13817

Browser - Favourites does not show GRASS folders with GRASS specific icons

2015-11-12 10:58 AM - Steven Mizuno

Status: Closed	
Priority: Normal	
Assignee:	
Category: Browser	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: end of life
Crashes QGIS or corrupts data: No	Copied to github as #: 21842

Description

in Browser - the Favourites top-level item does not show GRASS folders with GRASS specific icons and you cannot load a mapset, for example. Only a regular folder (file folder icon) is shown with no GRASS related context menu choices.

This happens even if you add a GRASS folder (showing the GRASS icon) as a favorite. It is just shown as a regular folder.

The regular drive/volume, Home and Project home tree items do show GRASS specific icons.

History

#1 - 2017-05-01 01:06 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

#2 - 2019-03-09 04:09 PM - Giovanni Manghi

- Resolution set to end of life
- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
