

QGIS Application - Feature request #13834

Labelling - place label horizontally outside the polygon

2015-11-15 08:56 AM - Darek Bobak

Status:	Open	Resolution: Copied to github as #: 21858
Priority:	Normal	
Assignee:		
Category:	Labelling	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>I'm working in archaeology. And I often have to label polygon layer which has polygons not connected to each other. The best way to label it would be to place labels horizontally, just by the edge of the polygon but OUTSIDE of the polygon. I'm attaching the sample from other software.</p>

Just use the "Move label" tool.

With hundreds of features? Manually? So what do I have a QGIS for?

#3 - 2015-11-15 10:14 AM - Paul Kanelli

I suppose you don't have to set the labels manually. Most likely there is a field calculator or PostGIS solution to set all x/y values automatically depending of the size of the polygons.

#4 - 2015-11-15 10:18 AM - Darek Bobak

With a dense distribution of irregular shape polygons I do not see the possibility to calculate the right placement for labels with a field calculator.

#5 - 2015-11-16 04:36 AM - Giovanni Manghi

- Category set to Labelling
- Target version set to Future Release - Nice to have

#6 - 2017-05-01 12:47 AM - Giovanni Manghi

- Easy fix? set to No
