

# QGIS Application - Bug report #13837

## Processing plugin wrong minimal version

2015-11-16 01:41 AM - Luigi Pirelli

<b>Status:</b> Closed	
<b>Priority:</b> High	
<b>Assignee:</b> Alexander Bruy	
<b>Category:</b> Processing/Core	
<b>Affected QGIS version:</b> 2.8.3	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 21861

### Description

Processing v2.12 is incompatible with QGIS version lesser than 2.12 (sorry for the redundant version number)  
metadata.txt says that is compatible with QGIS 2.6, but every QGIS LTR have problems:

"cannot import name show\_message\_log"

as described in the thread: <http://osgeo-org.1560.x6.nabble.com/Problems-with-Plugins-tc5236507.html>

this affect affecting all plugins that import processing running on QGIS less that 2.12

### History

#### #1 - 2015-11-16 01:50 AM - Alexander Bruy

- Resolution set to fixed/implemented

- Status changed from Open to Closed

oops, sorry. Plugin metadata now fixed and package updated

#### #2 - 2015-11-16 01:59 AM - Luigi Pirelli

alex, do you mind would be better to update to 2.12.1? there are already more than 1500 downloads and the only way to allow them to update automatically is to change the version

#### #3 - 2015-11-16 02:03 AM - Alexander Bruy

Added 2.12.1 version. Should I remove 2.12.0 then?

#### #4 - 2015-11-16 02:15 AM - Luigi Pirelli

I would remove... I hope this does not generate side effects. I supposed it's safe.
