Category: Documentation and Help

Pull Request or Patch supplied: Resolution: invalid Easy fix?: No Copied to github as #: 21897

#### Description

Documentation often gets a backseat to features in QGIS. It's a chore for people to do after the "fun" of building powerful features. Therefore, we should make contributing and distributing documentation as quick and painless as possible.

On <a href="http://www.qgis.org/en/docs">http://www.qgis.org/en/docs</a>, in addition to hosting documentation for each released version of QGIS, we should offer a rolling "Latest" release of the docs which is automatically built whenever documentation source is updated.

#### Pros:

- Show that you appreciate documentation changes by publishing them immediately.
- Always have available the "latest" docs for those using QGIS-master
- Makes it easier to publish the release version of the docs, since they're already built. Historically publishing documentation can lag quite a bit: (e.g. see #13212)

### History

#### #1 - 2015-11-24 12:50 PM - Michael Kirk

I'm actually a bit confused: I see this <a href="http://docs.qgis.org/testing/en/docs/index.html">http://docs.qgis.org/testing/en/docs/index.html</a> which sounds like what I'm asking for, but it seems out of date. Maybe it's just been manually made?

#### #2 - 2015-11-25 06:13 AM - Sebastian Dietrich

Interesting question.

The <u>latest documentation commit</u> (2015-11-25 9:53 UTC) is not yet integrated in the testing docs (2015-11-25 14:15 UTC). Let's have an eye on it when it will show up there!

## #3 - 2015-11-26 01:29 PM - Sebastian Dietrich

Ok, the mentioned commit <u>made its way to the testing docs</u> (checked at 2015-11-26 21:20 UTC). So probably this is the nightly build of the current documentation. It's sad :-(

Can this ticket be closed then?

#### #4 - 2016-04-02 12:25 PM - Harrissou Santanna

- Resolution set to invalid
- Status changed from Open to Closed
