Crashes QGIS or corrupts data:	No	**Copied to github as #:**	21931	

Description

On a polygon SHP file, I added a ring in QGIS 2.12, using the standard "add ring" tool. Then updated to QGIS 2.12.1. Now trying to delete the ring previously created. I am using the standard "delete ring" tool, and edit mode is toggled. The tool picks up the correct ring, and in edit mode the indicators for the ring vertex points are removed. But the ring is still there. When saving the edits, the ring, including the vertex points are still there. The function worked in QGIS 2.12.

Can you share your data file please?

#2 - 2016-01-26 11:32 PM - Kalle Kronholm

I have upgraded to QGIS 2.13.3 and just tested the delete ring tool. Now it works.

#3 - 2016-01-27 01:38 AM - Nyall Dawson
