| <p>In Print composer, I find this option rather obscure. It aims [0] at displaying or hide map annotation, so renaming it to, e.g. "Draw map canvas items" seems appropriate.</p> <p>[0]<br/><a href="http://docs.qgis.org/testing/en/docs/user_manual/print_composer/composer_items/composer_map.html#main-properties">http://docs.qgis.org/testing/en/docs/user_manual/print_composer/composer_items/composer_map.html#main-properties</a> : "Draw map canvas items lets you show annotations that may be placed on the map canvas in the main QGIS window."</p> |                       |                                      |
