

QGIS Application - Bug report #1398

ver QGIS-0.11.0-2-Setup win installer fails

2008-11-13 02:27 AM - cubarro -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Build/Install	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 11458

Description

I followed all the instalation process and after all messenger and shortcut in my desktop, **Quantum gis** in program files is not created. Something is failling...

I have 3.16 GB free in my hard disk and use Win Vista Home edition.

Also made a instalation with QGIS-0.10.0-Setup and the same error happens.

History

#1 - 2009-01-19 09:54 AM - Paolo Cavallini

- Resolution set to fixed

- Status changed from Open to Closed

Many reports of successful installations have been reported for recent versions. The problem is therefore probably a local one, solved with the new installer. Please test 1.0 and reopen the ticket if necessary
