

QGIS Application - Bug report #13993

eVis plugin and UTF8

2015-12-15 05:32 AM - Andrej Trdin

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	C++ plugins/Evis	
Affected QGIS version:	2.12.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: worksforme
Crashes QGIS or corrupts data:	No	Copied to github as #: 22007
Description		
<p>Hello,</p> <p>I'm using plugin eVis on QGIS 2.12.1, os win 10. If I make database connections to MS Access or MS SQL and then import some data to QGIS I get a mesh. I use CP win1250. Character like "ŠČŽ" become "&\$%" so I think there is a problem with UTF8? If is there use of function str() maybe unicode() will be better? Just guess.</p> <p>Thanks.</p>

- Status changed from Open to Feedback

Could you try with QGIS 2.14. The new gdal should resolve your problem.
