

QGIS Application - Bug report #13999

"Show feature count" on a rule based gives wrong result for the "ELSE" statement.

2015-12-16 05:17 AM - Etienne Trimaille

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 22013
Description		
<p>If we set a rule based with an "ELSE" statement, the feature count is wrong. It shows the total number of features in the layer. But it should be less as some other features are counted by the previous rules.</p> <p>However, features in the "ELSE" are not rendered twice, that's good.</p>
