QGIS Application - Feature request #14000
Altas option: hidden coverage layer > show current feature

2015-12-16 06:14 AM - Matt Sim

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	Map Composer/Printing		
Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	22014

Description

Use case: A layer contains a set of objects representing alternate configurations for the same feature. (size, scale, shape, orientation, style). A series of print maps are needed showing each configuration, independent of all others.

Feature request: add a checkbox indented and below "Hidden coverage layer"
Example:

[] Hidden coverage layer
   [] Show current feature

Behaviour: During atlas generation, hide all features on the coverage layer except the one currently active for map.

History

#1 - 2017-05-01 12:46 AM - Giovanni Manghi

- Easy fix? set to No

#2 - 2017-09-22 10:07 AM - Jürgen Fischer

- Category set to Unknown

#3 - 2019-02-12 04:38 PM - Pedro Venâncio

This can be achieved using the method described by Alexandre Neto here:

https://gis.stackexchange.com/questions/173399/filtering-features-in-other-layers-of-qgis-atlas

So, this ticket can be closed.

#4 - 2019-02-12 07:52 PM - Giovanni Manghi

- Category changed from Unknown to Map Composer/Printing

- Description updated

this is a nice workaround, but I agree with the issuer that this would be nice to be implemented as an Atlas option.
