

## QGIS Application - Feature request #1403

### Edit vector layer: Add possibility to move all selected features at the same time

2008-11-14 05:53 AM - gnaggi -

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> nobody -	
<b>Category:</b> Digitising	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 11463
<b>Description</b>	
In case of editing a postgis layer is it not possible to move multiple selected features at the same time using the "move object" button.	

#### History

##### #1 - 2008-11-14 07:04 AM - Jürgen Fischer

this shouldn't be limited to postgis layers.

##### #2 - 2009-11-27 09:02 AM - Paolo Cavallini

- Resolution set to fixed

- Status changed from Open to Closed

AFAICT, this function is now available in 1.3. Feel free to reopen the ticket if I misunderstood.
