

QGIS Application - Bug report #14044

Label rendering problem during zoom in or out

2015-12-30 03:37 AM - Mehmet Selim BILGIN

Status: Closed	
Priority: Normal	
Assignee:	
Category: Labelling	
Affected QGIS version: 2.12.1	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: worksforme
Crashes QGIS or corrupts data: No	Copied to github as #: 22055

Description

This bug is about rendering features' labels. Tested with QGIS 2.12 on Win7 OS. I added two vector layers (named 1 and 2) in linestring geometry and they are overlapping. And I gave them labels by using this expression **layer_property('1','name')** for layer 1 and **layer_property('2','name')** for layer 2 than I noticed that during zooming in or out the labels placement changing. For example one zoom level changed it look 12 and one more it looks 21. I added screen images please check them.

History

#1 - 2016-05-25 08:57 AM - Saber Razmjooei

- Resolution set to worksforme
- Status changed from Open to Closed
- File zoom1.PNG added
- File zoom1.PNG added

Tested in 2.14.3 and works as expected.
