Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	22058

Description

From the Style Library you can :

   - Export to PNG : export to distinct PNG files the **selected** symbols

   - Export to SVG : export to distinct SVG files the **selected** symbols

   - Export : opens a dialog to select the desired symbols, should they be Marker, Line, Fill or Color ramp item. It then saves these symbols into a single xml file.

It may be more handy to have a single Export button that still opens the symbol selection dialog with an option to choose the file format at its bottom.
If xml is choosen, it'll generate one file containing all selected symbols and if SVG or PNG is selected, it'll create as many files as selected symbols.
