QGIS Application - Bug report #1405
Python Plugin Installer not UTF-8 aware

2008-11-17 02:57 AM - Andreas Neumann

Status:	Closed		
Priority:	Low		
Assignee:	Borys Jurgiel		
Category:	C++ Plugins		
Affected QGIS version:		**Regression?:**	No
Operating System:	All	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	invalid
Crashes QGIS or corrupts data:		**Copied to github as #:**	11465

Description

It seems like the Python QGIS Plugin installer has problems displaying UTF-8 characters.

As an example I am using german umlauts in the plugin description which is not displayed correctly.

Tested on Ubuntu 8.10 (current SVN trunk) and Win2K with QGIS 1.0 Preview2

History

- Resolution set to invalid

- Status changed from Open to Closed

It's correct behaviour, just remember to use unicode strings (u'foo') in init.py methods. Note also that QGIS < commit:4c5e4838 (SVN r9664) didn't support unicode plugin metadata.
