<b>Description</b>	
<p>In the style manager, create a group and add symbols to it Open a layer properties &gt; style and at the top level of the symbol tree, select the group in the "Symbols in group" drop-down. You should have only your group symbols displayed Now, click on 'Open Library' and close it Your group name is still shown in the drop down list but the symbols displayed are rather from "Groups" group.</p> <p>If you delete a group or add a new one, these changes are not applied to the list (though the deleted group appears empty) until you close the layer properties dialog.</p> <p>master ae2738e</p>
