Crash in QgsGeomColumnTypeThread stopping connection scan

I just got a segfault with current master (670ded3d0622811f8e0ba50b3fd5e783742044) by clicking on "stop" in the "Add PostGIS Layer" dialog, while it was scanncing a database.

It's still the QgsGeomColumnTypeThread...

Fix double-release of postgresql connection on table retrieval stop

Also breaks earlier out of loop and print a different status message on "stop" (rather than "complete").

Got it, ColumnTypeThread handling of "stopped" (mStop) is not thread-safe.
