

QGIS Application - Bug report #14154

Digitizing: "Reuse last entered attribute values" should not overwrite primary key column

2016-01-21 07:28 AM - Andreas Neumann

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Digitising	
Affected QGIS version:	master	Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 22156
Description		
<p>When digitizing, the "reuse last entered attribute values" option also sets the value of the last value of the primary key column.</p> <p>This value has to be unique, so it makes no sense to set the value of the last digitized record.</p> <p>In fact, with this setting enabled, one has to manually remove the last value - which is quite annoying.</p>
