QGIS Application - Bug report #14188
QGIS crashes when removing vertex of a multipart geometry
2016-01-28 10:41 AM - Salvatore Larosa

Status: Closed
Priority: Severe/Regression
Assignee: Sandro Santilli
Category: Digitising
Affected QGIS version: master
Operating System: El Capitan OSX, Debian, Ubuntu 64bit
Pull Request or Patch supplied: No
Crashes QGIS or corrupts data: Yes

Resolution: Copied to github as #: 22190
Regression?: No
Easy fix?: No

Description

The crash occurs when removing vertices of a multipart geometry.
The multipart geometry was created with the Merge selected features tool.

Stacktrace:

Program received signal SIGSEGV, Segmentation fault.

Revision 781c9d7f - 2016-02-01 05:30 PM - Sandro Santilli

Do not dereference null pointer on QgsSelectedFeature::updateGeometry

Fixes #14188

History

#1 - 2016-01-29 04:52 AM - Martin Dobias

Tried with multipolygon, multilinestring and multipoint - deleting vertices one by one until the geometries are completely gone - but I am unable to replicate the problem. Would you mind sharing the data where you get the crash?

#2 - 2016-01-31 03:50 AM - Salvatore Larosa

I attached a small part of my shapefile. Anyway, you should before using the merge selected features tool on the shapefile and merging to the big polygon then you use the node tool (while the geometry is selected) to remove the vertices. Sometime it crashes just if I remove a couple of vertices and sometimes I have to remove a lot of vertices before crashing.
Step to reproduce with the attached dataset:

- load the shapefile and start editing
- select features 10102 and 3009 (gid)
- use merge selected features tool
- select node tool and click over the feature merged (might crash here)
- click again over the feature (not over the nodes)
- QGIS crashes

#5 - 2016-01-31 09:59 AM - Giovanni Manghi
- Status changed from Feedback to Open

confirmed here on Ubuntu 14.04.

#6 - 2016-02-01 07:38 AM - Sandro Santilli
- Assignee set to Sandro Santilli

I'm taking this, please let me know if anyone else is already working on a fix (assign to yourself if so, thanks)

#7 - 2016-02-01 07:44 AM - Sandro Santilli
- Operating System changed from El Capitan OSX, Debian to El Capitan OSX, Debian, Ubuntu 64bit

I could reproduce here

#8 - 2016-02-01 07:52 AM - Sandro Santilli

Valgrind detects a first memory error during merge:

src/core/qgsmaprendererparalleljob.cpp: 211: (renderingFinished) [51ms] PARALLEL finished

Sandro thanks to take care of this, unfortunately it still crashes for me, with different stacktrace, but it crashes:

Program received signal SIGSEGV, Segmentation fault.

Fixed in changeset commit:"781c9d7fc2c144b94be16c23522da8ae1ce0e63d".
Salvatore: same steps, to reproduce ?

Oops, I can still reproduce too, maybe I reverted the actual fix before pushing ??
Salvatore could you please try commit:24a9f491812a3a044c28a4406a24764504d792db ?

Yes, I am building.....

- Status changed from Reopened to Closed

works for me, thanks
