

QGIS Application - Bug report #14220

Error in rule-based style with different scale/zoom

2016-02-03 02:15 AM - Francisco Collantes

Status: Closed	
Priority: Normal	
Assignee:	
Category: Symbology	
Affected QGIS version: 2.12.1	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: not reproducible
Crashes QGIS or corrupts data:	Copied to github as #: 22220
Description	
Hi!	
I just found a bug about rule-based style. When I change the zoom at least a point change the expected colour, which depends of a rule based on the value of a field: Green: (POS=0); Red: (POS>0)
