In case that this issue tracker is not a proper place to report this kind of bugs - it would be useful to note at <http://www.qgis.org/en/site/getinvolved/index.html> where issues with website should be reported.

Hi,  
fixed in <https://github.com/qgis/QGIS-Website/pull/312>  
The issue tracker of qgis website is at <https://github.com/qgis/QGIS-Website/issues> and there's already a pending [pull request](#) to add informations about issue tracker.

Note that there's a direct link at the bottom of each page to help you reach the right page to fix the issues (you just need a GitHub account) or at least reach the issue report website.

Thanks for reporting.
