

## QGIS Application - Bug report #14236

### Moved labels disappear from the rotated map canvas and from rotated print composer on projected CRS

2016-02-05 04:53 AM - Isabella Merkulova

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Map Canvas	
<b>Affected QGIS version:</b> master	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 22233
<b>Description</b>	
<p>Bug is presented when you choose in Project properties any projected coordinate system (not geographic). Labels that have been moved with "move label tool" disappear from map canvas or print composer when you try to rotate map. This is related to bug #12005, that is closed, but problem hasn't been solved.</p>	

#### Associated revisions

##### Revision d36fb619 - 2016-10-03 06:21 AM - Nyal Dawson

[labeling] Fix data defined placement with rotated maps

For layers requiring reprojection and with rotated maps any labels with data defined x/y would not be rendered

Fix #14236

- Status changed from Open to Feedback

I cannot confirm on QGIS master.

- label a layer
- set fields for data defined position
- toggle editing, move label
- save
- rotate map > the moved label shows in the new place

What is still confirmed is #13840

### #2 - 2016-02-08 12:10 AM - Isabella Merkulova

- File label-problem.qgs added

Well, I can't say that it's true for my projects. I attach a project for example. Here names of objects in black font have higher priority than labels in purple font. Labels in black have coordinates (\$x and \$y) and they disappear from print composer with rotated map (look at the print composer "rotation-map").

| "rotation-map").

That's why is important attaching sample projects and data, I can clearly see the issue with yours, but I wasn't able to replicate myself.
