QGIS Application - Bug report #14257
Size assistant expression misses double quotes for fields names in some cases

2016-02-09 05:24 AM - Regis Haubourg

Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22253	

Description

when testing size assistant with fields coming from a join , named with a prefix initialized with layer name I faced a small bug:

layer name: label44 copier

field prefix for joins: label44 copier

field name once joined: label44 copier_attr

expression output from size assistant:

    coalesce(scale_exp(label44 copier_attr, 1, 2, 1, 14, 0.57), 0)

That expression is not correct, when it should be

    coalesce(scale_exp("label44 copier_attr", 1, 2, 1, 14, 0.57), 0)

This is a edge case but can happen. Quoting field names will prevent that
