

QGIS Application - Bug report #1426

Digitizer allows island creation with no poly selected

2008-11-25 05:01 AM - barryrowlingson -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Digitising	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 11486

Description

If you select 'add island', and don't have a feature selected, you can create an island (which might take some time if you have a detailed island) and then right-click to finish only to get an error because you forgot to select a feature before you started.

Hence loss of work, and hair.

Island creation tool should either be disabled if no features selected, or check at the **start** instead of the end!
