Description

Folliwing the vector feature counts moved to vector layer commit 038acbc76083dae3fd29795b9e73d97cd92c3d3a fixes #6237, QDialogProcess is used in QgsVectorLayer::countSymbolFeatures. But no GUI tools has to be hardcoded in core.

QgsVectorLayer::countSymbolFeatures has a parameter showProgress with defaut value to True.

The method countSymbolFeatures is used in QgsLegendModel and QgsMapLayerLegend without parameter.

To fix it, it's probably possible to simply remove the use of QDialogProgress. Any thoughts ?
